If they cash out successfully, they win their bet increased by the current coefficient. If the airplane flies away (crashes) before they cash out, the bet is lost.

Unlike traditional slots where the outcome is determined totally behind the scenes by a Random Number Generator (RNG) spinning undetectable reels, Aviator puts the element of timing straight into the gamer's hands.

- **The Dual-Bet Strategy:**
    - *How it works:* Players put two bets all at once. The very first bet is set to auto-cash out at a moderate multiplier (e.g., 2.00 x) to protect a revenue or break even. The second bet is left to run manually for a greater, riskier multiplier (e.g., 10x or greater).
    - *Objective:* Balancing safety with the adventure of chasing an enormous payment.
- **The Martingale System (Use with Caution):**
    - *How it works:* Doubling the bet after every loss, with the intention of recuperating all previous losses plus a revenue when a win lastly takes place.
    - *Objective:* Mathematically recuperating losses, though this requires a large bankroll and can quickly strike table limits.
