The Anatomy of a Plinko Board

- **The Drop Zone:** The top of the board where gamers release the disc.
- **The Peg Field:** A staggered grid of metal or plastic pins. Whenever a disc hits a pin, it has an approximately 50% opportunity of bouncing either left or right.

The Mathematics Behind the Bounce

Since of the method the pegs are set up in alternating rows, the path of the chip imitates a binomial circulation (typically visualized as a Galton board). This suggests chips are statistically much more likely to land in the center slots than in the extreme outer slots. To stabilize this out, online variations appoint lower multipliers to the center and greatly higher multipliers to the edges.
