The objective is easy yet agonizingly tense: gamers should place their bets before the round begins and **money out** before the aircraft flies away. If a gamer squanders successfully, their stake is increased by the present worth on the screen. However, if the plane flies away (crashes) before the gamer squanders, the bet is lost.

				£ 490.00

The Mechanics Behind the Magic: Provably Fair Technology

- The result of each round (the multiplier at which the plane flies away) is not created on the casino's servers alone.
- Instead, it is generated by integrating the server seed and the seed of the first three players in the round.
- Gamers can inspect and verify the fairness of every round in the game history by clicking the small green shield icon.
