Common Vehicle Shipping Options

Open Carrier Transport

Open carrier shipping is one of the most common and affordable methods for vehicle transportation. Cars are loaded onto an open trailer and transported with other vehicles. This option is suitable for most standard vehicles and offers an efficient solution for everyday transportation needs.

Enclosed Carrier Transport

Enclosed transport provides additional protection by placing vehicles inside a covered trailer. This option is often preferred for luxury vehicles, classic cars, collectibles, and specialty automobiles that require extra protection from weather and road conditions.

Door-to-Door Vehicle Shipping

Door-to-door service provides added convenience by allowing the carrier to pick up and deliver the vehicle as close as possible to the requested locations. This option reduces the need for additional transportation arrangements.

Terminal-to-Terminal Shipping

Terminal shipping allows customers to drop off and pick up vehicles at designated locations. This option may provide cost savings but requires additional coordination.
