2. **The Launch:** The round starts. A visual representation-- frequently a rocket, an airplane, or a rising line-- starts to rise, and the multiplier ticks upward from 1.00 x.
3. **The Climb:** As the multiplier rises, potential earnings increase. Stress constructs as players see the numbers climb, weighing their greed against their worry of losing.

- **High Volatility:** It is entirely possible to experience streaks where several video games crash at 1.00 x or 1.01 x, cleaning out a bankroll in seconds.
- **Speed of Loss:** Traditional slots can be fast, but the constant loops of crash games can lead to enormous monetary losses in an extremely brief timeframe.
