### The Mathematics and Odds: Is It Pure Luck?

Mathematically, a single round of Rock, Paper, Scissors against an entirely randomized challenger is a **uniform distribution game**.

- **Possibility of any single relocation:** 33.33% (1 in 3)
- **Probability of a tie:** 33.33%

- **Probability of winning/losing a single round:** 33.33%

Because the anticipated value (EV) of a single random toss is no, your house or opponent in theory has no mathematical edge over the long term-- if both parties have fun with outright randomness.

However, people are physically incapable of true randomness. When human beings attempt to produce random sequences, they exhibit distinct behavioral biases. This mental flaw is specifically what professional gamblers make use of to turn RPS into a video game of ability.

## Psychological Strategies for RPS Betting

- **If Player A wins with Rock**, they are statistically most likely to switch to **Paper** or **Scissors** in the next round.
- **Counter-Strategy:** Anticipate the switch. If your challenger wins with Rock, play the relocation that beats what they *would* rationally toss next (typically Paper, given that people unconsciously associate Paper with the previous winning relocation).

### 2. The Impact of Losses

When humans lose a round, their instant psychological reaction is to desert the losing move.

- **If Player B loses with Scissors**, they rarely toss Scissors in the instant next round.
- **Counter-Strategy:** Eliminate the move that just lost for your opponent, leaving only 2 likely options, and play the move that beats their most probable alternative.

### 3. Exploiting Gender and Cultural Biases

Research studies performed throughout the World Rock Paper Scissors Society championships revealed interesting analytical tendencies:

- Untrained male gamers extremely throw **Rock** as their really first opening move approximately 50% of the time, viewing it as a symbol of strength.
- **Counter-Strategy:** Against an unidentified male opponent in a high-stakes very first round, opening with **Paper** is a statistically sound speculative bet.
