- **Paper** covers Rock.

In a gambling context, 2 gamers (or a gamer and a house-backed platform) place a monetary stake on the result of a single round or a best-of-series match. The winner takes the pot, minus a small commission (typically called the "rake") if played on an arranged platform.

Player 1 \ Player 2 Rock Paper Scissors **Rock** Tie (50%*) Player 2 Wins Gamer 1 Wins **Paper** Gamer 1 Wins Tie (50%*) Player 2 Wins **Scissors** Player 2 Wins Player 1 Wins Tie (50%*)

** Note: Ties are typically re-played immediately till a conclusive winner emerges, making the real win/loss probability for a single definitive round 50/50 between the 2 active gamers.*

- **Paper** is the least common opening throw.

The Counter-Strategy: Open your very first match with **Paper**. If your opponent follows human averages and tosses Rock, you win immediately.

- **If a gamer loses**, they tend to shift to the gesture that *would have beaten* their challenger in the previous round.

Example:

- *Round 1:* You play Rock, your challenger plays Scissors. **You win with Rock.**
- *Forecast for Round 2:* Your opponent lost with Scissors. Following the "Lose-Shift" guideline, they will likely switch to Rock (since Rock crushes Scissors, the relocation they simply lost with).
- *Your counter for Round 2:* Play **Paper** to beat their awaited Rock.
