1. **Place a Bet:** Players pick their preferred stake before the round begins. Wagers can usually be adjusted across a wide variety to match both conservative bankrolls and high-roller strategies.
2. **Launch the Aircraft:** Once the round starts, the aircraft removes, rising vertically or diagonally across the screen.
3. **Gather Multipliers:** As the aircraft climbs up, it encounters various multipliers, stars, and fuel items floating in the airspace. Travelling through these items increases the overall payment for the round.
4. **Handle Fuel:** The airplane runs on a limited fuel supply. Every second in the air consumes fuel, and players need to collect fuel refills to keep the flight going.
5. **The Conclusion:** The round ends when the plane either runs out of fuel and comes down, or effectively finishes its flight path. The objective is to squander or build up the highest possible multiplier before the flight terminates.
