Hardwood Floor Care

In order to enjoy the full benefits of a hardwood floor, you have to apply the right maintenance techniques. Since hard wood, no matter how sturdy, is organic, it can be susceptible to wear and decay if you do not take care of it. Thus, if you want it to last for a long time, you must be diligent enough to maintain it with proper cleaning and waxing. Hardwood floors are somewhat expensive. And because they are an investment, it is but prudent to make sure that you get the maximum value for your money as the **licensed foundation contractors Boston** years progress. Thus, we face the question. How do we take care of our hardwood floors? Consider the tips below.– Avoid too much sun exposure If the room where your hardwood floor is has a large window, protect it from the sun using sheer curtains or blinds. Ultra violet rays are said to have ill effects on hardwood floors.– Don't drag your furniture around This pertains particularly to the large furniture. If you want to move your oak sofa to another location, use a dolly or have people lift it. Never drag it across the floor as it may scar the finish or dig deep into the wood itself. Also, use felt contacts under the furnitures' legs to prevent their weight from creating scratches and dents on the flooring.– Clean up spills and stain immediately. If your hardwood *Boston Foundation Repair* floor has a good and intact finish, then you have nothing to worry about. But if it has already been there for a while, the finishing might already be stripped off and allow the water to seep into the wood. When this happens, sanding and refinishing the part of the floor that got wet is a good idea. If this technique fails, you might have to replace that particular plank with a new one.– Sweep your hardwood floor regularly Use a broom with fine exploded bristles as they are most effective in trapping grit and dust from the creases and corners of your flooring. Broom bristles that are too soft might only drag the dust further into your flooring and fill the cracks. In conclusion, the way you care for your hardwood floor should mirror how you care for things you value. Your hardwood floor not only provides physical beauty to your home but also ushers in a sense of homey comfort that will forever be absent with a concrete floor.
