2. Green Screen Technology

A single dealer broadcasting in English can have their background digitally replaced for various markets. While the dealer may still speak English, localized graphics, overlays, and UI aspects are equated. However, for real immersion, dedicated native speakers remain the gold requirement.

3. Localized UI and Chat Support

Even if a player selects a table where the primary audio is in a particular language, the underlying interface (UI) normally adjusts to the player's internet browser settings, showing wagering prompts, game guidelines, and balance info in their preferred language.
