Players put bets on numbers (1, 2, 5, or 10) or on one of the 4 reward games (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). If the wheel stops on the segment a gamer has bet on, they win a payment or gain entry into an interactive reward round.

The Top Slot Feature

Above the main money wheel sits a smaller, two-reel slot maker called the **Top Slot**. With every spin of the primary wheel, the Top Slot likewise spins instantly. It produces a random multiplier and sets it with a random bet area (either a number or a bonus offer video game).

If the primary wheel lands on the exact matching sector, the payment for that number or the multiplier for that bonus round is boosted accordingly. This is where enormous payouts can start to form before gamers even reach a bonus offer round.

The Four Extravagant Bonus Rounds

The true body and soul of Crazy Time are its 4 bonus offer rounds. These mini-games transport gamers far from the primary wheel and into immersive, computer-generated bonus offer environments.

1. Coin Flip

The easiest of the 4 perk rounds, Coin Flip uses a quick and straightforward mechanic.

- **How it works:** A coin with a red side and a blue side is put in a mechanical flipper. Each side is appointed a random multiplier before the flip.
- **The Outcome:** Whichever color deals with upward when the coin lands identifies the multiplier used to the gamer's stake.

2. Money Hunt

Money Hunt is an interactive shooting gallery design video game where gamers must make a split-second choice.

- **How it works:** An enormous screen shows 108 random multipliers hidden behind various signs (such as a cactus, a target, a chef's hat, and so on).
- **The Outcome:** Players are given a short countdown to goal and fire an on-screen cannon at a symbol of their choice. Once the timer ends, all signs reveal their covert multipliers, and the gamer wins whatever value lagged their selected target.

3. Pachinko

Influenced by the conventional Japanese arcade video game, the Pachinko perk round is all about gravity and suspense.

- **How it works:** The presenter reaches a platform and drops a puck down a big board filled with physical pegs. At the bottom of the board are numerous multiplier values, alongside a "DOUBLE" zone.
- **The Outcome:** The puck bounces down the board and lands in one of the multiplier slots. If it lands on "DOUBLE," all multipliers at the bottom of the board double in worth, and the speaker drops the puck a second time. This can repeat until the optimum multiplier limit is reached.

4. Crazy Time

The holy grail of the game, Crazy Time takes players behind an enormous red door into a surreal, Alice-in-Wonderland-style virtual world.

- **How it works:** Players are faced with a massive virtual wheel featuring 64 sections filled with big multipliers and "DOUBLE" or "TRIPLE" wedges. Before the wheel spins, players should choose among three flippers (Green, Blue, or Yellow).
- **The Outcome:** The presenter presses a big red button to spin the wheel. Whichever segment aligns with the gamer's chosen flipper determines their reward. If the wheel arrive on "DOUBLE" or "TRIPLE," all multipliers on the wheel are doubled or tripled, and the wheel spins once again. This procedure can duplicate, potentially leading to the video game's optimum advertised payment of 20,000 x the bet.

Techniques and Approach

While Crazy Time is fundamentally a game of chance governed by random number generators (RNG) and physical physics, gamers frequently employ different tactical techniques to handle their bankroll and optimize their entertainment time.

- **The Low-Volatility Approach (The Safety Net):**
    - Focusing greatly on numbers 1 and 2, that make up a considerable portion of the wheel. This method yields frequent, smaller sized wins that help sustain the player's balance for a longer period.
- **The Bonus Hunter Approach:**
    - Wagering exclusively or mainly on the 4 perk rounds (Coin Flip, Cash Hunt, Pachinko, and Crazy Time). Due to the fact that these sectors appear less regularly on the wheel (just 9 sectors overall), this technique includes longer droughts in exchange for access to the game's main function attractions.
- **The Balanced Approach:**
    - Spreading little bets across both numbers and reward rounds to make sure eligibility for the benefit mini-games while keeping a cushion from regular number hits.
