What is Plinko?

At its core, Plinko is a game of pure likelihood. Coming from famously on the television program *The Price Is Right* in the 1980s, the digital gambling adaptation has structured the idea for online casinos.

The setup is simple:

1. A player picks a stake quantity.
2. A chip, ball, or disc is dropped from the top of a triangular grid filled with staggered pegs.
3. As gravity pulls the disc down, it bounces randomly off the pegs, altering direction with every impact.
4. The disc eventually lands in among a number of slot containers at the bottom, each associated with a particular multiplier.

While it looks deceptively easy, online versions of Plinko have progressed to use high levels of personalization, enabling gamers to customize the volatility to their preferred playing design.

- **High Risk:** The large majority of central slots lead to a loss (multipliers less than 1x), however the extreme outer edges use massive payouts, sometimes rising to 1000x the preliminary stake or more.
