Payment Structure and House Edge

The payout for each round is computed as:

$$[\text{Payout}] = [\text{Stake}] \times [\text{Multiplier}]$$

The multiplier climbs exponentially with each exposed diamond. The exact growth curve is set by the game company, however normal multipliers follow a pattern similar to the one revealed below for a 3-mine game:

Number of Diamonds Revealed	Approximate Multiplier
1	1.20
2	2.50
3	3.20
4	4.30
5	5.50
6+	Continues to rise rapidly (10 ×, 20 ×, and so on)

The house edge for Mines generally varies from **2% to 5%**, depending upon the variety of mines chosen and the specific game provider. Higher-mine setups tend to have a slightly higher edge because the probability of striking a mine increases.

Strategic Tips for Playing Mines

- **Start with a Low Mine Count**-- Begin with 1 or 2 mines to get a feel for the multiplier development. This technique decreases the probability of an early loss.
- **Set a Loss Limit**-- Decide beforehand the optimum amount you are willing to lose in a session. Adhere to this limitation no matter winning or losing streaks.
- **Utilize a Cash-Out Strategy**-- Many experienced players squander after reaching a predetermined multiplier (e.g., 2 × or 3 ×). This locks in a profit and avoids the temptation to chase higher rewards.
- **Take Advantage of Bonuses**-- Welcome benefits and reload promotions can extend playtime without running the risk of additional personal funds. However, always examine the wagering requirements.
- **Avoid the "Gambler's Fallacy"**-- Each round is independent; previous results do not influence future outcomes. Do not presume a mine is "due" after a series of diamonds.

Accountable Gambling

While the Mines game can be amusing, it brings a danger of monetary loss. Players should:

- ** Gamble just with cash they can afford to lose.
