

Egress windows, often added when finishing a basement, require careful waterproofing consideration, and JLB Foundation Repair and Basement Waterproofing addresses this specific need for Gladstone homeowners. An improperly waterproofed egress window well can become a significant water entry point, undermining an otherwise well protected basement space. JLB's team ensures proper drainage and sealing around egress window installations, whether working on a new window well or addressing water issues around an existing one.

JLB Foundation Repair [basement waterproofing](#) and Basement Waterproofing | 111 NE 72nd St Ste 111, Gladstone, MO 64119 | (816) 408-3651

This attention to detail matters particularly for basements being finished for living space, where an egress window water issue could damage new construction significantly. For basement waterproofing around egress windows in Gladstone MO, contact JLB Foundation Repair and Basement Waterproofing at (816) 408-3651.
