Selecting more mines increases the prospective multiplier for each successful tile exposed but considerably raises the risk of hitting an explosion.

- 3. The Tension:** This is the essence of the game. Every subsequent click substances the prospective payout, but the analytical probability of hitting a mine increases with every cleared tile.
- 4. The Result:** The game ends either when the gamer hits a mine (resulting in a loss of the round's wager) or when the player chooses to withdraw their winnings.
