What is a CS: GO Case Battle?

The mechanics are straightforward:

1. **The Buy-In:** Participants choose a set of cases and settle on the variety of rounds. The overall cost of the cases serves as the entry cost for each player.
2. **The Opening:** Rounds play out sequentially. In each round, every player opens the designated case.
3. **The Scoreboard:** The worth of every skin dropped is tallied in real-time based upon present market rates.
4. **The Winner:** At the end of all rounds, the gamer (or group) who has actually collected the greatest total monetary worth of skins wins **all** the products dropped in the battle-- consisting of those opened by opponents.

If luck is on a player's side, they can win an inventory worth tremendously more than their initial buy-in. If luck fails, they lose whatever. It is this high-risk, high-reward dynamic that drives the immense popularity of the format.
