2. **The Ascent:** Once the betting phase closes, the round starts. A graph or an animated item (frequently a rocket, jet, or terrorist character) removes, and the multiplier ticks up in real-time.
3. **The Crash:** The round ends quickly when the system sets off a crash. This can occur anywhere-- even quickly at 1.00 x (often referred to as an "instantaneous bust"), or it can soar past 100x, 500x, or higher.
