

Crowns and bridges are part of the restorative dentistry offered at Whites Dental Marble Arch, used to repair damaged teeth or replace missing ones without resorting to a full implant. A crown covers and protects a damaged tooth, while a bridge fills the gap left by one or more missing teeth by anchoring to the surrounding healthy teeth. The practice's dentists assess each case to determine whether a crown, bridge or an alternative treatment such as an implant would best suit the patient's specific dental situation.

Whites Dental Marble Arch (W2) | 52B Kendal St, St George's Fields, London W2 2BP | 020 3576 2325

Restorative treatments like crowns and bridges are handled alongside cosmetic options, meaning patients can address both function and appearance within the same practice. For crowns [emergency wisdom tooth removal](#) and bridges in Marble Arch, contact Whites Dental on 020 3576 2325 or visit 52B Kendal St, St George's Fields.
