

A request about dormant pruning needs a description of the tree as well as a preferred season. List the trees separately and explain the outcome you want discussed. Ask which parts of the proposal depend on species, condition or a closer assessment, without treating a seasonal label as a complete work instruction.

Make the proposed work readable

Read the proposal alongside the original enquiry and ask whether the two refer to the same tree and concern. Check the purpose and practical arrangements as well as the task name. Request clarification if a broad phrase could describe more than one kind of work.

This tree-care planning guide from Progressive Tree [Progressive Tree Service tree service near me](#) Service focuses on dormant pruning enquiry and the information needed to discuss it clearly.

The brief for a shared household

Collect the questions from everyone involved before the visit. Where preferences differ, record them as points for discussion instead of passing along conflicting instructions. Agree who will keep the current proposal and share any changes with the others.

Questions to keep with the record

What still needs to be assessed before the proposed pruning and timing can be confirmed? Can the written description be checked against the concern? Ask for an explanation that connects the answer with the particular tree and proposed work, then record anything still unresolved.

A practical next step

Keep the clarification with the proposal. If the scope changes, request an updated description rather than relying on a remembered conversation.

Keep the timing question attached to the tree it concerns instead of applying the same assumption to every tree.

A shared record is useful only if the latest explanation reaches each person taking part in the decision.

Business Name: Progressive Tree Service

Address: 1124 Florence Ave, Evanston, IL 60202, USA

Phone: (847) 530-1533

Progressive Tree Service

Tree service by ISA Certified Arborists with locations in Evanston and Chicago (Lakeview).
