Platform Type	How It Works	Estimated House Edge
Peer-to-Peer (P2P)	Players wager versus each other; the platform takes a small commission (rake).	1%-- 5% (Rake)
Provably Fair Crypto	Gamers bet against a random number generator (RNG) or clever agreement.	1%-- 3%
Arcade/Casino Variants	Single-player video games against an automated home dealership with side bets.	3%-- 8%

(e.g., If you beat their Scissors with Rock, they are most likely to toss Rock in the next round because they were simply believing about Rock).
